Cie BRUBOC

CLOWN | SURREAL | NON-VERBAL | ALL AUDIENCES

WALKABOUT VERSION: NO TECHNICAL REQUIREMENTS

Autonomy:

The stage vehicle is fully self-contained and equipped with its own sound system.

Surfaces and slopes:

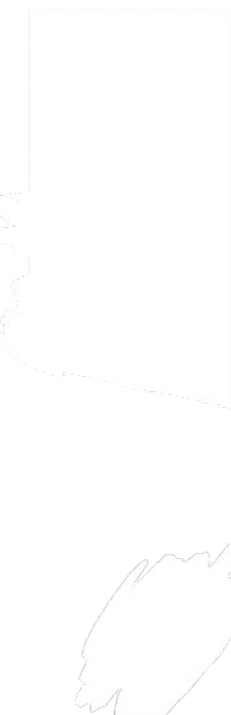

It can move and perform on different types of terrain, including natural ground, cobblestones and other paved surfaces, as well as on uphill and downhill slopes.

Route distance:

There are no specific limitations regarding the distance covered.

Night-time lighting:

The vehicle has its own lighting system, ensuring visibility and creating a poetic atmosphere during night-time performances.

CLOWN | SURREAL | NON-VERBAL | ALL AUDIENCES

FIXED-LOCATION VERSION SPACE REQUIREMENTS

Surface: Flat ground

Dimensions:

Minimum performance area of 6 × 7 metres

Audience arrangement:

Frontal or semicircular, with an opening of approximately 180°

Audience capacity:

Maximum of 500 spectators

Night-time lighting:

The performance area must have adequate lighting to ensure good visibility of the show.

SET-UP AND DISMANTLING

Quick set-up without occupying the performance space:

the stage structure is assembled entirely outside the performance area.

Once ready, the company enters the performance space directly, with everything prepared for the show.

At the end of the performance, the structure is immediately removed from the performance space and dismantled in the designated area.

No set-up or dismantling takes place in the performance space.

This system allows for quick entry and exit, frees up the performance area within minutes and facilitates the smooth changeover between companies during the festival.

LOGISTICAL REQUIREMENTS

Parking

For the company's motorhome and trailer, close to the performance venue.

Dressing room with toilet

Storage space: a secure, enclosed space to store the stage vehicle and equipment overnight, only when performances take place on several consecutive days.

The vehicle can pass through a standard-sized doorway and measures 2.00 m long × 0.85 m wide × 1.80 m high, weighing 250 kg.

Standard electrical socket to recharge the stage device.
